

## Milestone 2 Rubrics – React & React Native Apps

**Total points: 300**

1. convert the html/css pages to react components and pages (minimum 3 pages on web and mobile app each) – **120 points**
  - a) React web app – **60 points**
  - b) React Native mobile application – **60 points**
2. project architecture and folder structure – **40 points**
3. code quality and proper use of re-usable components – **40 points**
4. functionality (forms, page navigation, loaders, etc) – **30 points**
5. CRUD operations - data querying and mutations using APIs (already developed in previous module) – **30 points**
6. use of any global state management tool (for eg: Context, Redux, etc) – **30 points**
7. use of good and appropriate naming conventions (variables, states, props, functions, components, etc) – **10 points**
8. **Bonus points** if you've learnt some new concept(s) of React (not discussed in class) and implemented it in your project (you should know the use case) – **50 points**

ENJOY BUILDING STUFF! 😊
